# Foreword

نحمده ونصلی علی رسوله الکریم ، اما بعد

I have perused this booklet in your hands and have found it to be very useful. Marhoom Hakeem Yusuf Molvi (rahimahullah) used to always tell me, “Listen to the wisdom of the old people and you will acquire knowledge which is not found even in books.” There is an Arabic saying as well, *سَلِ الْمُجَرَّبَ وَلَا تَسْأَلِ الْحَكِيمَ* “Ask the experienced person and not the philosopher.”

This book is full of tried and tested recipes which have been found useful. Here I have to sound a note of caution that if one is not sure of any ingredient helping them and it might be harmful for them, then it should be queried from a qualified Hakeem. Secondly, if no benefit is noticed, then too a Hakeem has to be consulted. It will help a person tremendously to help themselves recover using natural methods instead of going through conventional medication which is really costly and full of harmful side effects.

I ask Allah to accept this work and make it beneficial to the Ummah. *Aameen.*

## Preface

---

All praise is due to Allah Ta'ala, The Everlasting, The Kind, The Merciful. Durood and Salaams be in abundance upon our Master, Sayyiduna Muhammadur Rasulullah ﷺ.

It is mentioned in a Hadith of our beloved Nabi ﷺ, “Verily your body has a right over you.” When a person is well and healthy he/she is able to function well. He is able to practice on all the injunctions of Deen easily as compared to a physically ill person. Good health is equated to a thousand other favours because it is with this one favour of good health that man will be able to enjoy the thousands of other favours of Allah Ta'ala. Rasulullah ﷺ has said;

لِكُلِّ دَاءٍ دَوَاءٌ فَإِذَا أُصِيبَ دَوَاءُ الدَّاءِ بَرَأَ بِإِذْنِ اللَّهِ عَزَّ وَجَلَّ

*There is a remedy for every sickness, and when the remedy is applied to the sickness it is cured with the permission of Allah, the Exalted and Glorious.*

إِنَّ اللَّهَ أَنْزَلَ الدَّاءَ وَالذَّوَاءَ وَجَعَلَ لِكُلِّ دَاءٍ دَوَاءً فَتَدَاوَوْا وَلَا تَدَاوَوْا بِحَرَامٍ

*Allah Ta'ala has sent down both the disease and the cure, and He has appointed a cure for every disease, so treat yourselves with medication, but do not treat yourselves with anything haraam.*

مَا أَنْزَلَ اللَّهُ دَاءً إِلَّا أَنْزَلَ لَهُ شِفَاءً

*There is no sickness that Allah has created except that He also has created its cure.*

For thousands of years, Hakeems all over the world, especially in the Indian sub-continent, would prepare medication for intricate illnesses from ingredients that may be available in a housewife's kitchen. Without having to go to a doctor or purchase expensive medication from a pharmacy, mother's and grannies were able to prepare effective medication for different illnesses from their kitchens.

Unfortunately these remedies are slowly becoming extinct. Many of the older people have passed on and the younger generation have lost these valuable remedies. People are now forced to go to Doctors and pay exorbitant sums of money to purchase medication from Drug companies in order to regain their health. There are many illnesses that can be easily treated from home rather than having to spend large amounts of money at doctors and purchasing expensive medication which have harmful side effects.

Thus, it was in the spirit of preserving these “**Home Remedies**” that our beloved Ustaadh, Hadhrat Mufti Ebraheem Salehjee Saahib (*daamat barkaatuhu*) suggested that these remedies be preserved in a booklet which may then be beneficial to all. An effort was then made to contact the elderly women in many families to note down some of the common remedies that they used so that it could be of benefit to us all.

A special request is made to the readers to please inform us of any errors as well as other remedies that may not be included in this book. We make dua to Allah Ta'ala to accept this little booklet and make it a means of benefit for the Ummah.

## 7 Guidelines for Good Health

---

إِنَّ لِنَفْسِكَ عَلَيْكَ حَقًّا

“Verily your body has a right over you.” (Hadith)

Rasulullah ﷺ has mentioned that there are two favours which most people take lightly; “Good health and free time.”

Looking after our health is an essential part of a Muslim’s life. If we are not careful regarding this important aspect of our lives, then we may be deprived of many important aamaal (May Allah Ta’ala protect us all). We may be unable to perform Salaah with Jama’ah, go out in the path of Allah, make jihaad and help the poor and needy if we do not preserve good health.

In another Hadith, Rasulullah ﷺ has mentioned, “A strong Muslim is better and more beloved to Allah Ta’ala than a weak Muslim.”

We have been repeatedly taught in the Ahaadith to make dua for good health and seek Allah Ta’ala’s protection from dreadful diseases. One such dua is as follows, “O Allah! Keep my hearing well, keep my sight well and keep my body well.”

Make shukar and thank Allah Ta’ala for the good health that we enjoy and in turn Allah Ta’ala will increase us in good health.

Health and sickness are both from Allah Ta’ala alone. However, we have been commanded in the Qur’aan to take precautions. If we adhere to the

following 7 points, Insha Allah, we will enjoy good health throughout our lives.

## 1. Clean Air

Make a point of breathing in fresh clean air.

After Fajar, take a walk and breathe in deeply from your nose allowing the fresh morning air to filter through your lungs. Exhale from your mouth. Hadhrat Moulana Hakeem Muhammad Akhtar Saahib (Rahimahullah) has mentioned, “Subah ki hawa, Laakho ki dawa” (The fresh morning air is a medicine for hundreds of thousands of ailments).

Allow fresh air and sunlight into the home daily and ensure that the house is free from dampness.

Hadhrat Moulana Ashraf Ali Thaanwi rahmatullahi alayhi used to say that if a person takes a walk after the Fajar Salaah with the intention of enjoying good health, then he will Insha Allah receive the same reward as the one who sat in the masjid up to Ishraaq Salaah.

Refrain totally from smoking or sitting near those who smoke.

## 2. Clean Water

Drink clean fresh water. If possible, drink rain water or borehole water (provided it is tested and declared safe to drink). If this is not available, install a water purifying unit in your home whereby you can obtain filtered water instead of the water directly from the tap. Do ensure that you use a good quality filter.

Drink 8 glasses (+ 2 litres) of water per day.

Avoid drinking water ½ hour before and after meals.

Try and avoid drinking very cold or iced water.

### 3. Exercise

Most of us are unmindful of this. One should exercise at least 3 times a week for 20-30 minutes.

People with busy schedules may suffice with at least 15 press-ups and 20 sit-ups at the beginning of the day.

At the least, a brisk walk every second day for approximately 20 minutes will do you much good. Those men who live within walking distance from the masjid should make it a habit to walk to the masjid for their five times salaah. (NB. Women should not go out walking on the street. Rather they should walk in their homes or in their yards).

### 4. Balanced diet

Eat two meals a day instead of three. Supper should be a light meal.

Refrain from eating processed foods (polonies, sausages, patties, foods with artificial colouring and preservatives, etc.).

Avoid eating too much of oily foods or food fried in oil.

Avoid eating between meals.

Don't over eat. We learn from the Hadith of Rasulullah ﷺ to reserve one third of the stomach for food, one third for water and one third for air.

Cook simple meals. Avoid cooking too many varieties for one meal. The Hakeems are of the opinion that eating various different types of food in one meal is not conducive to good health.

## 5. Sleep

Hadhrat Moulana In'aamul Hasan Saahib (Rahimahullah) had advised that every person should get 6 hours of sound sleep daily.

One cannot function efficiently without having sufficient sleep.

Rasulullah ﷺ has encouraged us to have Qayloolah (an afternoon nap ± 45 minutes). This sleep in medical terms is referred to as a power nap. Nabi ﷺ has said that having an afternoon nap will assist one in waking up for the Tahajjud Salaah.

## 6. Control of emotions

Rasulullah ﷺ has, on several occasions, cautioned the ummat about controlling their emotions. There are many Ahaadith of Nabi ﷺ wherein there are severe warnings for those who do not control their anger as well as those who harbour jealousy, hatred and rancour in their hearts for others. This eventually builds into stress within us.

Stress has become very common. Due to our hectic lifestyles, the long hours that we work, we begin to stress and those around us suffer the consequences.

People who cannot manage their stress levels adequately are prone to cardiovascular high blood pressure, diabetes and other illnesses.

### **7. Elimination of toxins (Detox)**

Due to our unhealthy diet, we have a build-up of toxins in our bodies. These toxins need to be eliminated from time to time. Toxin build-up in the colon is the root of many illnesses.

In order to eliminate these toxins, one should take 2 Tablespoons of Castor oil in half a glass of orange juice every two months.

Drinking a lot of water also helps to eliminate toxins from the body.

May Allah Ta'ala keep us all physically and spiritually healthy. *Aameen.*

## Sure Prescription for any ailment

---

In case of any illness, a person should first adopt the following steps before taking any medication.

1. Perform 2 Rakaats of Salaatul Haajah.
2. Make earnest dua to Allah to grant you Shifaa.
3. Give some Sadaqah daily.
4. Increase the recitation of Istighfaar
5. Read Surah Faatihah 7 times. Blow in the water and drink. Also blow on the sick patient.
6. Drink Zam Zam water with the intention of shifa.
7. Do this with complete Yaqeen (conviction) in the words of Allah Ta'ala and Nabi Muhammad (sallallahu alayhi wasallam).
8. First resort to some home remedy.
9. Thereafter, if medical help is required, one may adopt the necessary means.

## Acid Reflux / Heart Burn

---

### Remedy 1:

- ¼ tsp bicarbonate of soda
- ¼ cup hot water

### Method:

Mix together and drink.

### Remedy 2

#### **Stomach pain / Acid reflux / Heart burn**

- 1 tsp apple cider vinegar
- ½ glass water

### Method:

Add 1 tsp Apple cider vinegar to ½ glass water. Sip this water while eating.

## Acne

---

### Remedy 1:

- 1 litre Milk (preferably dilute with water)
- 2 tsp nutmeg (jaifal)
- Honey to sweeten

- 1 loaf whole wheat bread
- butter
- salt

### Method:

Oven dry one loaf whole wheat bread. Store in an airtight container. Crumble 2 slices, boil with 1 ¼ cup water, 1 tsp butter and a pinch of salt. Strain and drink as hot as possible upon awakening and at bedtime.

### Remedy: 2

- 60g finely chopped garlic
- honey

#### Method:

Pour 600ml boiling water over 60g finely chopped garlic. Allow to stand in a sealed container for 10 hours. Add enough honey to contents till a syrup forms. Take 1-2 tsp 3 times a day with meals.

### Remedy: 3

- Saffron strands
- Goats milk

#### Method:

Saffron strands infused in boiled goats milk will give relief to a chesty person.

## Burns

---

### Remedy: 1

- A slice of tomato
- Honey
- Egg-white.

#### Method:

Apply any of the above on the wound.

### Remedy: 2

- flour

### Method:

Dip wound in flour for ± 5 mins to avoid blistering.

### Remedy: 3

Place wound in ice-cold water.

## Cold/ Running Nose

---

### Remedy 1:

- ¼ tsp Arad (haldi / turmeric powder)
- ¼ tsp fine salt
- ¼ tsp Bicarbonate of soda

### Method:

Mix together with ¼ cup hot water and add honey to sweeten.  
Drink mixture twice a day.

### Remedy 2:

- 2 Tblsp honey
- ¼ tsp black pepper
- ¼ tsp cinnamon powder
- ¼ tsp nutmeg (jaifal) powder

### Method:

Squeeze ½ lemon and mix all these ingredients in a glass. Warm mixture and drink.

### Remedy 3:

- ½ cup warm water
- ½ tsp salt

Also try: Mint tea, Ginger tea.

## Post Natal Care

### **Herbal bath**

Combine the leaves of the gum tree, eucalyptus and guava tree. Boil the leaves and allow the infusion to cool slightly, but it must still be hot enough for the herbal bath to work thoroughly.

# General Guidelines for Health in winter

---

*By Hakeem Jaleel Muhammad Pandor*

Stop eating foods that are cold in nature or touch.

Dress warmly especially early in the morning and at night.

Increase foods that create heat in your body. E.g. Methi paak, ginger paak, ginger tea, cinnamon tea, etc.

Exercise daily till a light perspiration is noted.

Refrain from cold foods as well as foods that are dry.

Eat foods that will increase heat, i.e. meat, spice, soups, etc.

Heavy foods can be eaten slightly more as digestion improves in winter.

Do not eat foods that are very sweet.

Dress warmly at all times, inside and outside.

Do not go outside with the body or hair wet.

Keep the feet, ears and nape covered all the time.

The body should be washed regularly so as to not block the pores which will cause harm in spring.

Use oil or cream to keep your skin moisturised.

## Conclusion

---

Good health is a great favour of Allah Ta'ala. A person in this worldly life is blessed with only one set of limbs and organs. If he takes good care of it, he will enjoy a good healthy life. Many of our seniors who took care of their health were seen performing their salaah standing even at the age of 90. We can also hope to enjoy such good health provided we take care of ourselves.

We hope and make dua to Allah Ta'ala that these few remedies mentioned in this little booklet become a means of benefit for the Ummat at large.

NB. The remedies mentioned in this book are for small general illnesses etc. If someone falls extremely ill, please contact a qualified, experienced physician. Do not try to treat yourself as this can become a means of harming yourself. The famous Urdu poem says:

*Neem Hakeem khatra-e-Jaan*

An unqualified doctor is a threat to your life

May Allah Ta'ala accept this little booklet and make it a means of great benefit for all those who contributed towards it any way.
